Bring it all to life

Intel Inside®. Powerful Solution Outside.
Powered by Intel® Core™ Processors.

The LIFEBOOK and STYLISTIC range of mobile devices from Fujitsu is where computing performance meets cutting-edge corporate requirements.

Offering a rich set of features, ergonomic usability and available in an attractive range of designs, these lightweight, sleek and dependable devices are built for modern working environments. Combining more than 30 years of technical and design expertise, Fujitsu's expansive range is underpinned by five key values that deliver cutting edge innovation, dependable reliability, ultimate performance, energy efficiency gains and the tangible green IT credentials demanded by customers operating in critical line of business scenarios.

In the office, from remote locations or at home, LIFEBOOK or STYLISTIC devices featuring up to 6th generation Intel® Core™ processors provide a superior experience for even the most demanding mobile computing users.

Everyday tasks are made easier with intuitive touchscreen and digital pen input, combined with usage-extending battery runtime which exceeds the working day. Expansive wired and embedded wireless provisions, including 3G and 4G, deliver connectivity away from fixed networks, while industry-leading data protection keeps sensitive personal and enterprise information safe from breach.

From artwork and document content creation, interactive presentations, data-rich sales reports and spreadsheets, to task-orientated content consumption, bring it all to life with LIFEBOOK and STYLISTIC mobile devices.

LIFEBOOK | STYLISTIC

INNOVATION

With over 30 years of continuous Research & Development (R&D) – including 20 years tablet PC expertise – Fujitsu has demonstrated its position as a leading vendor of professional mobile devices by frequently bringing pioneering technologies to market first. Users benefit from valuable features such as sophisticated security provisions protecting corporate data, expansive wireless and wired connectivity and modular bay expansion options.

RELIABILITY

All Fujitsu mobile devices undergo extensive factory testing such as vibration and shock tests, conducted in-house within Fujitsu's German and Japanese production facilities. The use of durable materials, components and optional maintenance support packs all ensure peace of mind throughout the product lifecycle.

PERFORMANCE

Fujitsu cater for all businesses with bespoke factory configuration options to meet individual computing requirements and deliver significant contributions to mobile productivity. Business customers benefit from a no-compromise approach to mobile computing, choosing from an expansive range of notebook and tablet devices dependent on specific needs.

EFFICIENCY

Enjoy significant and tangible TCO reductions and reduced system wear thanks to ultra-efficient power supplies and cooler system operation. High-capacity swappable and expandable battery technology ensures maximum up-time, keeping device users operational and productive for extended working durations.

GREEN

Genuine 'green' credentials, including state-of-the-art international hardware decommissioning facilities, are reinforced by independent global environmental accreditations – including ENERGY STAR, EPEAT and Blue Angel standards – demonstrating Fujitsu's commitment to sustainable and ecological mobile computing.

Touch Tablet

The latest Windows tablet devices from Fujitsu feature technology such as finger-touch displays for swiping through content as well as digital pen input (model dependent) for content creation. Available in lightweight pure Slate and Hybrid form factors, each touch tablet features extended battery runtime and advanced wired and wireless connectivity, ensuring data, contacts and business information is only a tap away, while pioneering security provisions protect confidentiality on the move. 4

Apps from Windows Store; vary by market.

Touch Convertible

Combining notebook look, feel and keyboard usability with a high-resolution touchscreen, the latest range of Fujitsu touch-enabled notebooks merge productivity with ease of use. Available in ultra-slim 12.5" and 13.3" sizes users no longer need to choose between a tablet or PC and can instead work with keyboard, mouse or touch input – all in one device. 8

Ultra-Portable

Best in class technology and mobile components wrapped in sleek and modern designs, Fujitsu ultra-portable devices weigh from just 1.19Kg and offer extreme versatility. Incorporating the latest business-critical features and ultra slim dimensions, these 13.3" and 14" models empower mobile working while retaining all the functionality demanded by travelling professionals. 9

Office

Screen sizes, performance and productivity-enhancing features for use within office environments, underpin the Fujitsu notebook portfolio. With a range comprising of 13.3", 14" and 15.6" notebooks, the right device can easily be matched to every user without compromise. WiFi and Ethernet connectivity for always-connected content, plus a range of optional built-in security features, these everyday notebook devices offer the perfect blend of technology and style. 10

STYLISTIC R726

Be productive anywhere. With one device that's built for business.

In an increasingly mobile world, technology that meets flexible needs will become even more important, and sometimes, one device is all you need.

That's why we've created the STYLISTIC R726. It's a powerful 2-in-1 device that uses 6th generation Intel® Core™ processor technology and transforms effortlessly from a business tablet to a business notebook. Weighing just 830g, it's designed for unlimited usability – you choose how you want to work. Use your fingers or a digital pen at the same time – the STYLISTIC R726 supports both – and work for almost 10 hours* without recharging the battery. Or transform the tablet to a notebook by attaching the magnetic keyboard.

Future-proof security features, such as: optional NFC for contactless Smart Card authentication, trusted platform module and encrypted SSD's; protect your data, wherever you are. You can rely on optional 4G/LTE for true mobile connectivity. And when you're back at the office, simply slot the device into a cradle to get your full desktop experience.

*9h 52min slate only / 8h 52min incl. keyboard (Productivity Workload MobileMark® 2014)

Intel Inside®. Powerful Solution Outside.
Powered by Intel® Core™ i7 vPro™ processor.

Additionally, with its 12.5" PLS Full HD touch screen (31.8 cm), the tablet is perfectly balanced for productive mobile working. And it's also light and robust enough for the go-anywhere flexibility that today's mobile professionals need.

The workplace of the future is human-centric and mobile. The R726 is the device to help you realise its potential.

LIFEBOOK T726

The versatile T726 combines notebook functionality with the ease of use of a tablet, thanks to the swivel-display combining finger touch and digital pen functionality. Powered by 6th generation Intel® Core™ processors, users can treat it like a traditional notebook and type using the keyboard. Or, they can twist the 12.5" screen around for effortless sharing and collaboration in tablet mode. By attaching a modular bay you can access additional functionality. And the T726 uses the same docking station as other LIFEBOOK devices.

LIFEBOOK T726

- Up to 6th generation Intel® Core™ i7 vPro™ processor
- Windows 10 Professional / Windows 7 Pro
- 12.5" Dual Digitiser HD (IPS) LED anti-glare touchscreen (1366 x 768)
- Dual digitiser for pen input plus capacitive multiple touch screen for finger input
- Modular bay for adding a 2nd battery, DVD-RW, or Weight saver – shares same accessories with E700 Series
- Stay connected with optional 3G/UMTS, 4G/LTE, GPS, WLAN and Bluetooth
- Built-in security with optional Fingerprint sensor, Smart Card reader and TPM
- Battery run time up to 11 hours (1st battery) up to 14 hours (2nd battery)
- From only 1.8Kg in weight
- Fully dockable and shares the same optional dock as E500 Series, E700 Series and U745
- 2 Year Collect & Return Warranty

LIFEBOOK E700 Series

Bridging the gap between Ultrabook™ devices and traditional notebooks, the stylish all-metal E700 family is loaded with business conscious features and is up to 25% slimmer and 15% lighter than standard Fujitsu corporate notebook offerings.

E700 models address the day-to-day challenges faced by IT departments in the hardware integration processes – especially where multiple user profiles are managed. Thanks to common internal components (motherboard with BIOS and bit image) as well as common accessories (such as AC adapter, Fujitsu family docking station shared with the E500 range and modular bay elements), IT procurement and end-users will experience simplified rollouts, fewer time consuming tests and simpler maintenance. Available in three notebook screen sizes and one stylish uniform design.

Apps from Windows Store; vary by market.

Case Study – Cafcass

»The Fujitsu devices are making us more productive and less bureaucratic – notes can be submitted to the system instantly with no need to return to the office.«

Rob Langley, Head of IT, Cafcass

The benefit

Cafcass' social workers can:

- work effectively from anywhere
- engage with children, who respond more intuitively to touchscreens
- instantly upload the notes they enter with a stylus pen
- attend videoconferences to reduce costly travel

The customer

The Children and Family Court Advisory and Support Service (Cafcass) is the voice of children in the family courts. It helps to ensure that children's welfare is put first during proceedings.

The challenge

Cafcass has many employees working in the field – at court, in schools and at homes. Its existing laptops were bulky, unresponsive and unpopular with users. It wanted to find a truly mobile solution that would increase productivity.

The solution

We rolled out over 1,800 preconfigured Fujitsu LIFEBOOK U772 Ultrabooks™ and Fujitsu STYLISTIC Q702 hybrid tablets. These devices connect to 4G data networks and digitise handwritten notes.

Conclusion

"It gives us the flexibility we need to become a more effective organisation so we can focus on our core work" concluded Rob Langley.

Case Study – Electronic Warfare Solutions

»The independent advice and support we received from ERUD IT and Fujitsu essentially meant that we had our own part-time IT Director and on-demand IT support department.«

Dave Ruddock, Technical Director, Electronic Warfare Solutions

The benefit

- The inclusion of the Trusted Platform Module (TPM) and disk encryption as standard ensure sensitive data is safe
- Reliable operation and trusted support ensure the smooth running of the business
- Modular laptop bays can take extra batteries or hard disk drives for added flexibility, durability and extensibility

The customer

Electronic Warfare Solutions (EWS) is an independent and highly specialist company providing consultancy services that help government agencies, industry and users of defence equipment to simplify and streamline complex procurement and deployment activities.

The challenge

The members of the EWS team were working from remote locations more often than their UK office and as the company grew, so did its need for more reliable, high-performance systems. It was also recommended that the team standardise on a single mobile PC – the Fujitsu LIFEBOOK E752 as this device offered the best combination of reliability, resilience, performance and value available on the market.

The solution

Dave Ruddock, Technical Director, EWS, comments: *“The independent advice and support we received from ERUD IT and Fujitsu essentially meant that we had our own part-time IT Director and an on-demand IT support department.”*

Conclusion

“We have been able to concentrate on growing our business. We do 98 per cent of our business overseas and reliability is one of our key concerns” concluded Dave Ruddock.

Greener technology

We are helping businesses across the UK use ICT to transform to a low-carbon operation. Our specialists can advise you how to reduce your carbon footprint. So, you can meet compliance targets and improve energy efficiency in the data centre.

We can also provide low energy devices and help you reduce the impact of desktop PCs and printing. This environmental ethos influences everything we do, from the design of our products to how we recycle products at the end of their lives.

Fujitsu Warranty and Support Services

Apps from Windows Store;
vary by market.

Standard Warranty

At Fujitsu, quality is a top priority and our products are therefore developed to meet the highest quality standards. We offer a comprehensive manufacturer's warranty for all our products, which takes effect from the date the product is purchased.

Our standard warranty covers the cost of labour, materials, collection and return for claims made within the warranty period, ranging from 12 months to our enhanced warranties of up to 5 years from the date of purchase.

Additional Support Services

We also offer a range of optional service levels, including:

- Next business day on site service
- Extended warranties of up to 3 years on all models
- Extended warranties of up to 5 years on certain models
